SUMMARY

Full Stack Developer with a Bachelor's degree in Computer Science and Artificial Intelligence from Cairo University. Experience building SaaS products and client websites with React, Vue, TypeScript and Node.js, from API design to polished UI. Skilled in translating designs into scalable, maintainable code, optimizing performance and accessibility, and collaborating in agile teams.

EXPERIENCE

Saqaya – Frontend Developer (Vue.js) | Client: Mobysoft (UK) | Jul 2025 – Present

Stack: Vue.js, TypeScript, Pinia, Cypress

- Contributed to RentSense and RepairSense, leading social housing platforms in the UK.
- Developed responsive and scalable features with Vue.js, improving usability and performance.
- Collaborated in agile sprints with cross-functional teams to deliver product enhancements.

Saqaya – Full Stack Developer | OPSANA | Jul 2026 – Present

Stack: TypeScript, React, Hono, AWS Lambda, Zod, GraphQL, Jira Cloud and GitHub APIs
OPSANA: an agentic QA SaaS that turns GitHub, Jira and GitHub Projects data into evidence-backed confidence reports.

- Shipped features end to end in a type-safe TypeScript monorepo: Zod contracts, a Hono REST API on AWS Lambda, and a React SPA with a typed RPC client.
- Built the Jira Cloud and GitHub Projects integrations: a paginated GraphQL client, ticket and board ingest as agent context, and UI source pickers.
- Built and tested API endpoints for projects, repo linking, agent enablement and team invites. Fixed project-lifecycle data bugs.
- Led the OPSANA redesign across the app and marketing site. Built the AI report dashboard with live agent logs, a system map, journey flow diagrams and PDF export.
- Built the sign-up, onboarding and pricing flows. Improved performance and accessibility by removing React Compiler blockers and lazy-loading the PDF tooling.

Holden Knight Group Website – Frontend Developer | Nov 2025 – Present

Stack: Next.js, Contentful

- Built pages for holdenknight.com, a multi-division site (children's care, recruitment, complex care, academy) using Next.js.
- Modelled content in Contentful so non-technical staff can manage pages, blogs and testimonials without a developer.
- Built reusable, responsive components and nested navigation shared across divisions, with optimised images.

Impact Student Partners Website – WordPress Developer | Jul 2026 – Oct 2026

Stack: WordPress

- Built a responsive WordPress site for Impact Student Partners, a UK higher education support provider (Commercial Services Group).
- Structured the site around key services (Non-Medical Help, workplace support, university solutions) for easy navigation.

Freelance Backend Developer | Mar 2025 – Jun 2025

Stack: Node.js, Mongoose, MongoDB

- Designed and implemented a custom freelancing platform for client connections.
- Built backend services using Node.js and Mongoose, ensuring scalability and security.
- Delivered tailored features to meet client business requirements.

PROJECTS

KmtKids – Graduation Project

Stack: Express.js, FastAPI, MongoDB, Flutter, LangChain

- Educational platform for children, authorized by the Ministry of Culture, Egypt.
- Designed a system where teachers upload materials that are auto-categorized into interactive stories (lessons) and quizzes.
- Implemented a text and voice chatbot trained on the uploaded content to engage children interactively.

Areeb Technology Competition – Event Booking App

Stack: React, NestJS, TypeScript, MongoDB, Tailwind, JWT, i18n

- Built a complete event booking app with user and admin workflows, including a secure admin panel for event CRUD.
- Built a responsive, accessible UI with React (Vite), Redux Toolkit, React Query, Tailwind and i18n (English, Spanish).
- Implemented JWT authentication and authorization; deployed the database on MongoDB Atlas.

TECHNICAL SKILLS

Languages: HTML5, CSS, SCSS, JavaScript, TypeScript, SQL/NoSQL, C++, Python, C#
Frameworks & Libraries: React.js, Vue.js, Next.js, Node.js, NestJS, Hono, FastAPI, Zod, GraphQL, Bootstrap, Tailwind
CMS: WordPress, Elementor, Contentful
Databases & ORMs: MySQL, PostgreSQL, MongoDB, Sequelize, TypeORM, Mongoose
Testing, Cloud & Tools: Jest, Cypress, SonarCloud, AWS Lambda, Git, GitHub, NPM, Docker
Collaboration & Design: Figma, Adobe XD, Miro, Asana, Jira, Notion
Practices: REST APIs, Agile, Responsive Design, Accessibility, Performance Optimization, Unit and E2E Testing

EDUCATION

Cairo University – Faculty of Computer Science and AI (B.Sc.), Egypt | 2021 – 2025
